*This list provides a selection of continuing education opportunities that are known to Water Rights and the CE committee. It does not provide a list of every opportunity available to a driller. It is acceptable to obtain CE from sources not on this list as long as it pertains to well drilling and is approved by the CE committee either before or after the class is taken. This list will be updated regularly on our web site at www.waterrights.utah.gov/wellinfo and a revised list sent to licensed drillers quarterly.

**A class on Utah Well Drilling Rules is required at least once every four years. A take-home worksheet is also available that will satisfy this requirement. State-sponsored seminars will always offer this required class, however UGWA seminars may or may not offer this class. Check with association first.

Notes: Twelve CE credits are required each 2-year cycle to renew a driller's license. Generally, one hour of training is equivalent to one credit. At least two separate class (topics) must be taken each cycle to obtain the required credits. The required rules class must be taken at least once every four years. CE credit cannot carry over from one licensing cycle to another. It is the responsibility of the driller to maintain documentation of education and keep track of credits. Proper documentation can include the completed documentation form provided by the state for each class, diplomas, certificates, rosters, transcripts, etc. Drillers must provide copies of this documentation with their renewal application. For more information or questions, contact Jim Goddard at Water Rights at 801-538-7314.
